Names in Yellow have joined within the last 15 months

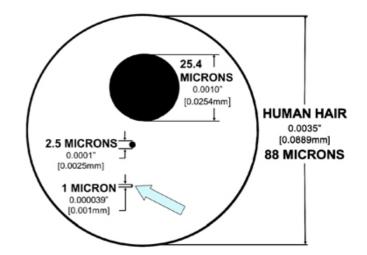

- · Ability to manufacture precision products with ultra tight tolerances in high volume
- · Total product life cycle
- · Established global footprint
- Highly specialized skill and engineering in bearing components and precision machining
- Significant proprietary knowledge and trade secrets

Leading manufacturer of high precision components

- · High precision manufacturing
- Operating tolerances of <1 micron</li>
- Specialty machine building and in-house tooling leading to significant competitive advantages – trade secrets
- · Application specific customer design
- Repeatable high volume global manufacturing in millions of parts per day
- Zero defect process design, extendable to additional industry platforms

25 high precision manufacturing facilities on 4 continents

# 2014 Strategic Progress

- January: Presented our strategic plan with goals to double revenue and triple EPS by 2018
- February: Acquired V-S Industries, a high precision manufacturer with locations in Wheeling, IL and Juarez, Mexico
- · June: Acquired tapered roller manufacturer RFK, located in Bosnia & Herzegovina
- July: Acquired the assets of Chelsea Grinding Company, a cylindrical roller manufacturer
- September: Acquired Autocam, a high precision manufacturer with locations on 4 continents
- 2014: Achieved strategic goal of 3% organic and 5% adjacent market expansion

We are ahead of schedule on the Strategic Plan

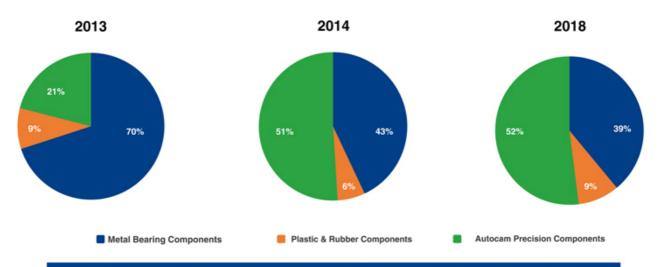

- Five new Board appointments since 2012
- New President & CEO in 2013, key management retained

### **Global Fuel Efficiency Standards**

Source: ICCT

- U.S. fuel efficiency requirements increase from 35 MPG in 2014 to 56 MPG in 2025
   → 60% higher
- The EU's 2020 requirement of 77 MPG is ~40% higher than the U.S. same-year requirement
- China and Japan will both require fuel efficiency to reach 50 MPG or above by 2020
- Rapidly increasing standards are driving OEMs to accelerate new technology development

Technology	Increase in Fuel Efficiency
Direct fuel Injection / High Pressure Diesel	15-30%
Multi-Speed Transmissions (6-9 gears)	5-10%
Variable Valve Timing / Variable Cam Timing	4-6%
Electric Power Steering	1 mpg

- · Build upon a strong, global operating platform while maintaining financial strength and flexibility
- Financial policy:
  - Maintain healthy leverage over business cycles and strategic growth period: Debt to EBITDA 2.0x 3.0x, < 4.0x at peak
  - · Cash flow priorities:
    - 1) Debt repayment to achieve target leverage
    - 2) Capex to achieve operational excellence and growth
    - 3) Stable common dividends to shareholders (< 20% free cash flow)
    - 4) Strategic acquisitions financed by debt and equity issuance to maintain leverage target
- · Generate above-market-average revenue growth and capture market share in key areas of new technology over Strategic Plan period
  - · Improve market mix by decreasing auto exposure from 70% to 50%
  - · Increase industrial /aerospace/medical offerings in existing product lines
- · Expand segment gross and operating margins (optimize mix, operational improvement, cost reductions)
- · Continue to invest in R&D
- · Continue to pursue selective strategic acquisitions to diversify end markets and expand global reach, within leverage targets
